

Course Key Concepts

Course key concepts are used to inform participants about your course. Please use the space below to identify 3 – 4 new concepts about your course. Include references that inform your work. The following are guiding questions to consider.

1. Is there new research your course cites?
2. What important information from your course directly applies to clinical practice techniques?
3. Are there any current statistics about the subject matter that creates a need for people to learn the information within your course?
4. What is the key take away for the learners in this course?
